

Quickly connect people with the help they need.

People working in the social and medical services need to refer their clients to other service providers. But too often, it's difficult to find up-to-date information for these referrals.

The free Johego app makes connecting your clients with social and medical services quicker and easier, so you can spend less time chasing information and more time helping people.

How It Works

1. Human-verified, up-to-date information.

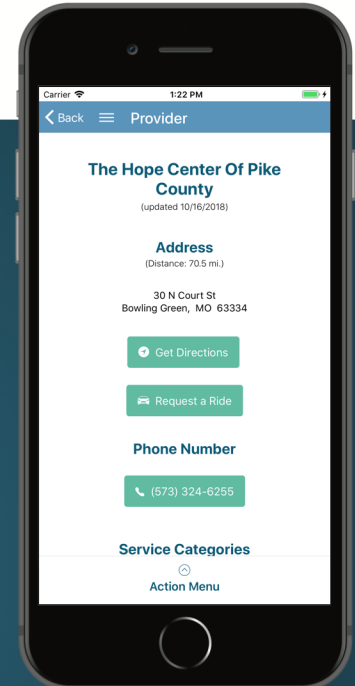

We collect and verify relevant information about thousands of providers across the country.

2. A simple, all-in-one source.

No more paper lists. No more endless Googling.

3. More than just an app.

Johego is a 501(c)(3) nonprofit. We can provide custom training, software development, and database management for organizations.
